Single Modular Approval. Output power is conducted. Values listed for LTE operations are for the highest power and the widest bandwidth for each band and modulation. This device supports LTE bandwidths of 1.4/3/5/10 MHz in Band 12 (Part 27), 1.4/3/5/10/15/20 MHz in Band 2 and Band 4 (Part 24 and 27). The maximum antenna gain is 1.0dBi. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operated in conjunction with any antenna or transmitter not described under this FCC ID. The final product operating with this transmitter must include operating instructions and antenna installation instructions, for end-users and installers to satisfy RF exposure compliance requirements. Compliance of this device in all final product configurations is the responsibility of the Grantee. Installation of this device into specific final products may require the submission of a Class II permissive change application containing data pertinent to RF Exposure, spurious emissions, ERP/EIRP, and host/module authentication, or new application if appropriate. Installation of this device into specific final products may require the submission of a Class II permissive change application containing data pertinent to RF Exposure, spurious emissions, ERP/EIRP, and host/module authentication, or new application if appropriate.
